## **Disclaimer**

Salamander Technologies, Inc. has made its best efforts to make the *Salamander* system reliable and defect-free; however, any computerized system is subject to malfunction including operator error, undetected system “bugs”, and power or communication outages. Salamander Technologies, Inc. cannot and does not warrant that the system will perform flawlessly at all times and under all conditions.

# 1 Introduction to *interTRAX*™ Mobile Software

## Overview

Welcome to the *interTRAX*™ Mobile User Guide. *interTRAX*™ Mobile software can be used to collect data from Salamander tags. The information that is collected can be sent to Command software while on site.

Salamander is setting the standard for resource accountability in the greater U.S. Fire Service and was designed with three objectives in mind:

**Simplicity** – Salamander uses nationally recognized incident management procedures. Use of the Mobile Unit [MU] is self-explanatory and intuitive. Mobile Units, often referred to as Pocket Personnel Computers, set the standard for simplicity in the industry. Most important, the PDF417 ID tags carry the person's database – just aim and shoot the MU to capture and display this data (name, rank, personal ID number, department, qualifications, etc.) on the spot. Operators can be trained to use the system in a matter of minutes.

**Survivability** - There are three tiers of survivability in Salamander System so that even a complete breakdown in electronic equipment does not inhibit accountability:

If communications to Central Dispatch or the internet are lost, incidents can be run from the Command Module.

If the Command Module is inoperable, basic accountability can be maintained via the MU's.

In the unlikely event that the MU's are down too, ID cards can be used as a traditional dog tag system to allow manual accountability.

PDF417 barcodes represent the ultimate in a distributed database – they survive even if the Host system is destroyed or inoperable.

**Scalability** - The *interTRAX*™ Suite was designed to scale across the entire fire service so that it would be the right size for the needs and budgets of any department. Small departments can start with an *interTRAX*™ Suite compatible dog tag system. Medium departments can purchase a basic *interTRAX*™ Suite system for only a few thousand dollars. Large departments can deploy multi-MU systems as part of a Wireless LAN controlled by a Command Module. You can barcode only your department or you can barcode all mutual aid departments in the surrounding area. If the incident expands beyond mutual aid, you can use a label printer to barcode new responders at staging. Tell your mutual aid partners about the system: The *interTRAX*™ Suite unites fire departments, mutual aid, and state & national responders with a common machine-readable format.

## **interTRAX™ Barcode & Smart Card Information**

The *interTRAX™* barcode is a two dimensional, high capacity barcode that follows the PDF417 data format. The *interTRAX™* smart card is an ISO standard 14443 or ISO standard 15693 contactless RFID card. The use of the information contained within either medium is protected by United States of America and International patents.

Within the *interTRAX™* suite the contents of the Smart Card and the barcode are identical.

The first time a Smart Card is encoded it is setup to hold either company or non-company information. After the initial setup of a company Smart Card it may be encoded with company information and a non-company Smart Card may be encoded with assignments, personnel, equipment and victims.

### **interTRAX™ Barcode & Smart Card Encoding – Personnel**

#### **Personnel Container**

The personnel container holds the following information. The items in bold print may be displayed in human-readable text. The human-readable text that appears is dependent on the type of ID tag, label or hardcard. The different types are listed below with the human-readable text that may appear if it is held in the container. The information available in the container and in human-readable text is dependent on the information that has been entered into the person's record.

1. Organization Country
2. Organization State
3. Organization Type
4. **Organization ID**
5. **Organization Name**
6. **Personnel ID**
7. **Last Name**
8. **First Name**
9. **Rank**
10. Date of Birth
11. **Qualifications**

#### **Human-Readable Text**

##### **Velcro Tag Label**

### ***interTRAX*<sup>TM</sup> Barcode & Smart Card Encoding – Personnel Medical**

#### **Personnel Medical Container**

The personnel medical container holds the following information. The items in bold print may be displayed in human-readable text. The information available in the container and in human-readable text is dependent on the information that has been entered into the person's record.

1. Organization Country
2. Organization State
3. Organization Type
4. Organization ID
5. Personnel ID
6. **Physician Name**
7. **Physician Phone**
8. **Insurance Carrier**
9. **Insurance Policy number**
10. **Emergency Contact**
11. **Emergency Contact Phone**
12. **Organ Donor**
13. **Resting Pulse**
14. **Blood Pressure**
15. **Blood Type**

- 16. Gender
- 17. Religion
- 18. Medications
- 19. Allergies

NOTE: The data read from the medical container is not retained by the MU's.

### **Human Readable Text**

#### **Laminated Manual ID Tag**

The human-readable medical information is printed on the inside of the tag and is protected inside a heat-sealed laminate pouch. It includes all of the highlighted information above.

#### ***interTRAX™* Barcode & Smart Card Encoding – Evacuee (rapidTAG evac) or Patient (Mobile EMS)**

### **Evacuee/Patient Container**

The evacuee/patient container holds the following information. The items in bold print may be displayed in human-readable text depending on the format of the ID Tag. The information available in the container and in human-readable text is dependent on the information that has been entered into the person's record.

- 1. **First Name**
- 2. **Last Name**
- 3. **ID**
- 4. **Date of Birth**
- 5. **Gender**
- 6. **Class (e.g., adult, caregiver)**
- 7. **Triage Priority**
- 8. Address
- 9. Special Needs
- 10. Parent
- 11. Triage Time

#### ***interTRAX™* Barcode & Smart Card Encoding – Equipment & Assignment**

### **Equipment Container**

The equipment container holds the following information. The items in bold print are displayed in human-readable text. The human-readable text that appears is dependent on the type of ID tag, label or hardcard. The different types are listed below with the human-readable text that may appear if it is held in the container. The information available in the container and in human-readable text is dependent on the information that has been entered in the record for the piece of equipment.

- 1. Organization Country
- 2. Organization State

3. Organization Type
- 4. Organization ID**
- 5. Organization Name**
- 6. Equipment ID**
- 7. Manufacturer Make**
- 8. Model**
- 9. Description**
- 10. Manufacture Date**
11. Equipment Type
12. Date in Service

### ***interTRAX™* Barcode & Smart Card Encoding – Company**

#### **Company Container**

The company container holds the following information. The items in bold are required.

12. **Organization Country**
13. **Organization State**
14. **Organization Type**
15. **Organization ID**
16. **Organization Name**
17. **Company Name**
18. **Company ID**
19. Kind
20. Designation
21. **NIMS Type**
22. Qualifications
23. Leader Flag
24. Personnel Collection
25. Equipment Collection'
26. Crews (not in barcode)

#### **Default Human-Readable text**

- Company Name
- Company ID
- Organization
- NIMS Type
- Company Leader Name
- Qualifications

## 2 *interTRAX*™ Mobile (ICS & EMS)

The *interTRAX*™ Mobile software is used to:

- collect data from *Salamander* tags, smart cards and Triage Tags
- manually enter information
- send the information collected to *interTRAX*™

**NOTE: This User Guide should be used in conjunction with the Mobile Hardware Setup Guide where information on mobile unit screen setup and network setup can be found.**

Tap on  in the lower left hand corner of the **Main** Screen

Tap on the **STI MOBILE** icon

The **interTRAX** suite **MOBILE** screen will appear

Initializing...

## Settings

### Initial Startup

Following the installation of MOBILE the Settings screen will appear. It contains three tabs. You must complete the information on these tabs prior to using all of the functionality available in the MOBILE software.

The Settings screen does not appear each time you start MOBILE. If you want to make changes use the popup menu in the lower left hand corner of the main screen.

To change this information after you have started an incident close - not end - an incident and access the settings using the popup menu. Then open the incident.

### **Menu → Settings**

### Servers Tab

#### **Add or Edit Server**

Tap on **Advanced**

Tap on **New**

Server Name	Active
ActiveSync Peer	
Bethany

Details History

Save Cancel

The resource will be moved to the new Assignment

## 2 Timer

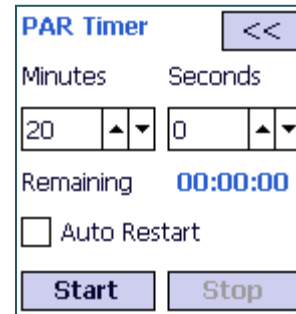

The Timer is automatically set for 20:00 minutes

### Minutes and Seconds

The minutes and seconds can be adjusted using the arrows or the soft keyboard

### Auto Restart

Check the Repeat box if you want the time to restart automatically after it has timed out

### Start and Stop

Tap on **Start** and **Stop** as appropriate to your needs

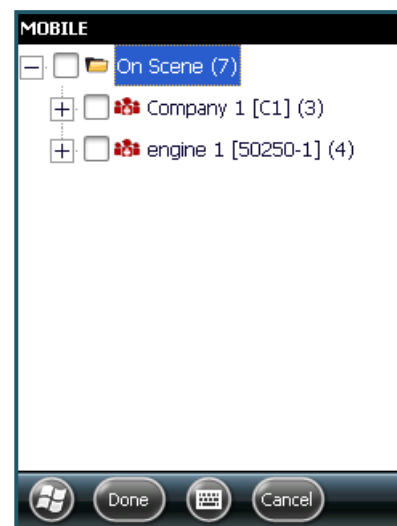

### Time Expired

When the Timer expires the **PAR** screen will appear

Check the boxes appropriate for the information received when calling for PAR

When you check the box for a Company, the Responders are also checked

Checking all of the boxes for the Responders in a Company will automatically place a check in the Company box.

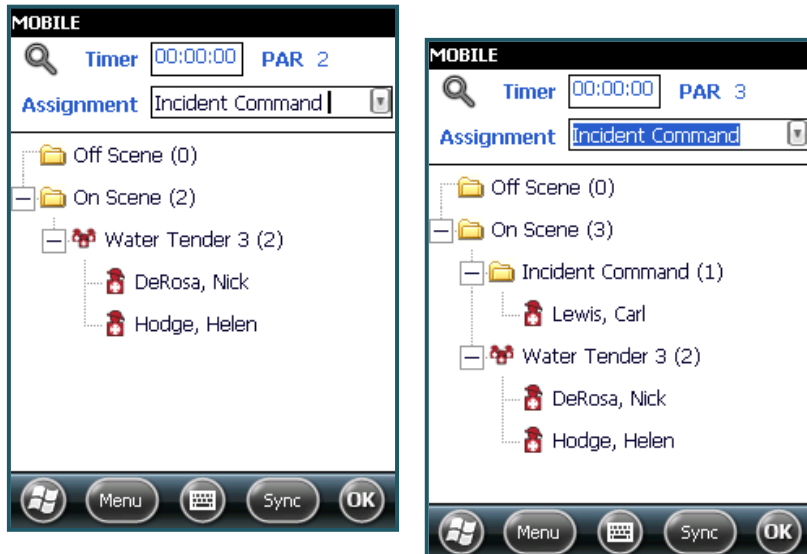

## 3 PAR

The PAR (Personnel Accountability Report) is the total number of personnel scanned on the scene. This number automatically increments up and down as personnel are scanned into Assignments and off of the scene.

**PAR 4**

## 4 Assignment

The Assignment dropdown includes all of the Assignments that have been scanned or manually entered into the MU. To manually enter an assignment, type it in the assignment box and click on the enter key or scan a resource and the assignment will be placed on scene with the resource attached. You may also add assignments on the Resource and Company Detail screen.

## 5 Incident Details

The Incident Details are presented in an incident command tree format

Assignments are not present in the tree when they are empty.

All Assignments that are added to an incident are placed subordinate to On Scene.

Each Assignment has a PAR count, shown in ( ), that represents all subordinates to that assignment.

On Scene ( ) PAR represents all of the personnel on scene and matches the PAR on the upper right side.

Tap on  to expand the Assignment and view the Resources within

## 6 Menu

### Menu prior to an incident

#### ***New Incident***

See the New Incident Section

#### ***New Medical Incident***

See the New Medical Incident Section

Windows Keyboard OK

### **Find**

Find

Responders

Equipment

Companies

### **Find – Responders, Equipment and Companies**

Check the Qualifications

Tap on **Find**

Only Resources or Companies with all of the Qualifications checked will be found

## **Add Companies**

See the Add a New Company to an Open Incident section

## **Roster**

See the Roster section

## **7 Soft Keyboard**

Tap on the Soft Keyboard icon and it will appear at the bottom of the screen.

## **8 Sync**

Tap on Sync and a series of screens will provide the status of the sync.

## **9 OK**

Tap on **OK** in the bottom right hand corner and the End Incident box will appear.

Tap on **Yes** to end the incident.

Tap on **No** to close the incident, keep it IN PROGRESS and maintain PAR.

Tap on **Cancel** if you have reached this screen in error and do not want to end or leave Mobile.

## Roster

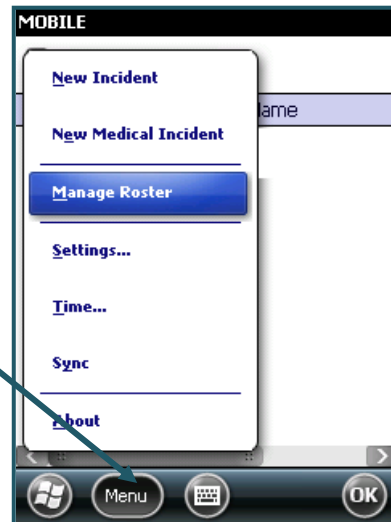

Prior to starting an incident you may want to consider adding companies to the Roster. When you open an incident you will have access to the information in the Roster and may easily add it to the incident.

### Add a New Company to the Roster - Manual

Prior to the start of an incident you may add companies to the Roster. This may be done manually using the menu or electronically by scanning barcodes.

Tap on **Menu**

Choose **Manage Roster**

Tap on **Edit**

Choose **New Company**

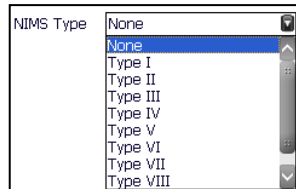

## Enter Company Information

**Name.** Type in a company name which is required. The maximum number of characters is 50.

**ID.** Type in a company ID which is required. The maximum number of characters is 50.

### NIMS Type

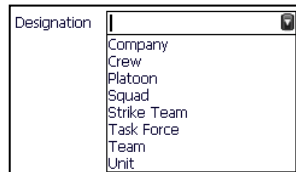

Choose the appropriate information from the dropdown

A dropdown menu for NIMS Type. The list includes: None, Type I, Type II, Type III, Type IV, Type V, Type VI, Type VII, and Type VIII. 'None' is currently selected.

### Designation

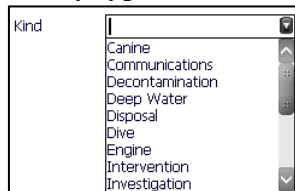

Choose the appropriate information from the dropdown or you may type in a designation.

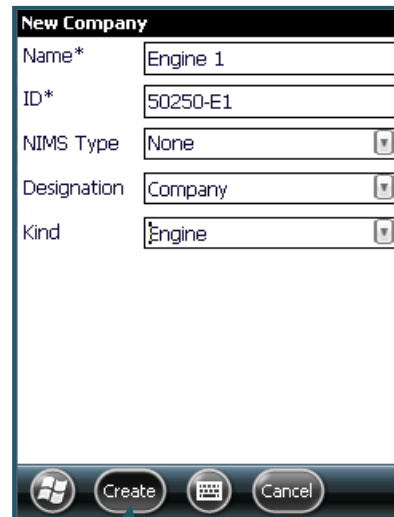

A dropdown menu for Designation. The list includes: Company, Crew, Platoon, Squad, Strike Team, Task Force, Team, and Unit.

### Kind

Choose the appropriate information from the dropdown or you may type in a kind

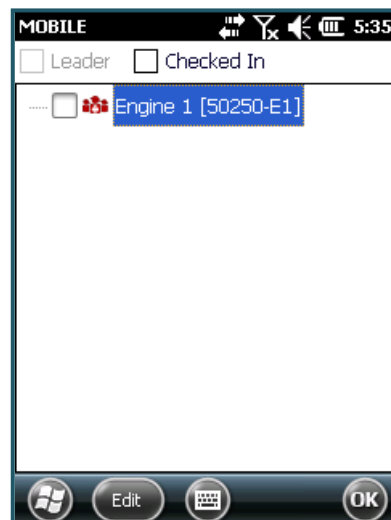

A dropdown menu for Kind. The list includes: Canine, Communications, Decontamination, Deep Water, Disposal, Dive, Engine, Intervention, and Investigation.

A 'New Company' form with the following fields: Name\* (Engine 1), ID\* (50250-E1), NIMS Type (None), Designation (Company), and Kind (Engine). At the bottom are buttons for Windows, Create, Keyboard, and Cancel.

Tap on **Create**

The company will appear

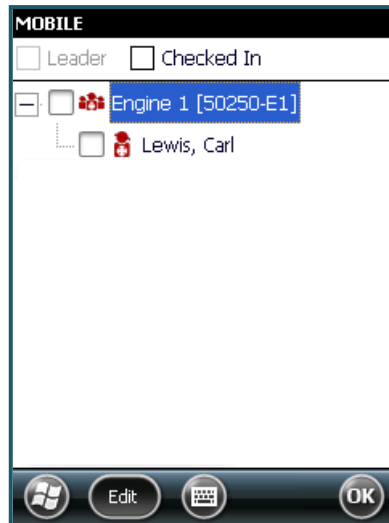

A mobile app screen titled 'MOBILE' showing a list of companies. At the top are checkboxes for 'Leader' and 'Checked In'. The list contains one entry: 'Engine 1 [50250-E1]' with a red icon to its left. At the bottom are buttons for Windows, Edit, Keyboard, and OK.

## Add Resources to a Company in the Roster – Manual

Highlight a Company

Scan in a resource

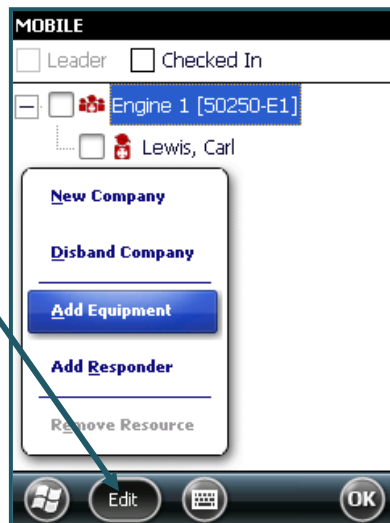

## Add Resources to a Company in the Roster – Manual

Highlight a company

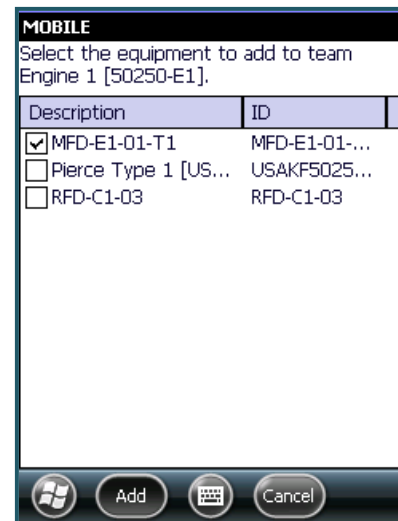

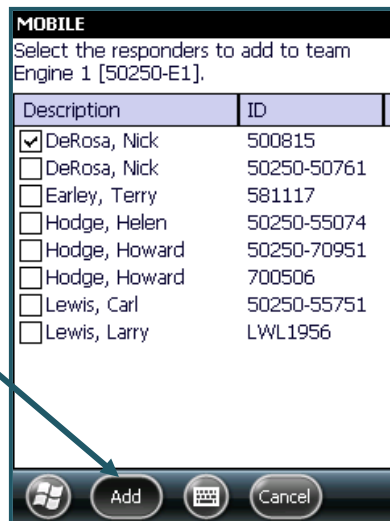

Tap on **Edit**

Tap on  
**Add Equipment** or  
**Add Responder**

Check the boxes for  
those resources that  
you wish to add to the  
company

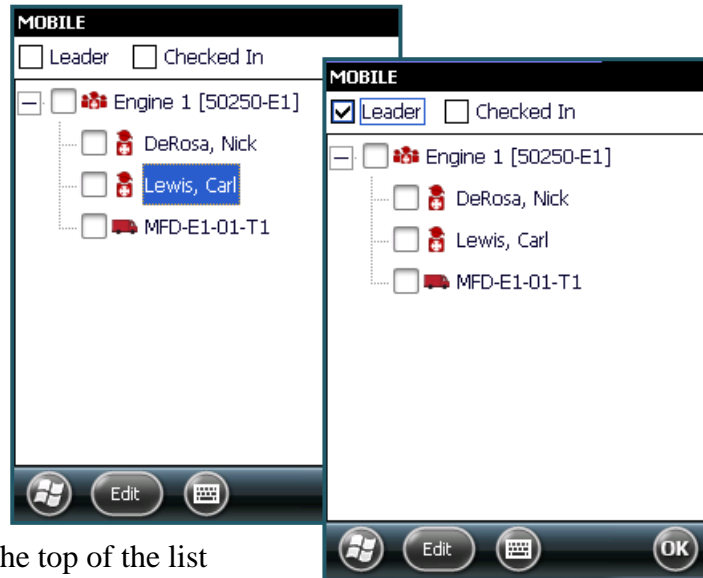

Tap on **Add**

## Set Leader

Highlight the resource

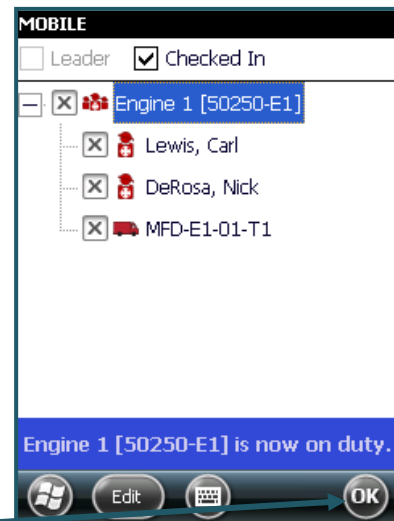

Tap on the **Leader** box

The Leader will appear at the top of the list

## Checked In

Check the boxes for the company and any resource that you wish to have the status of On Duty.

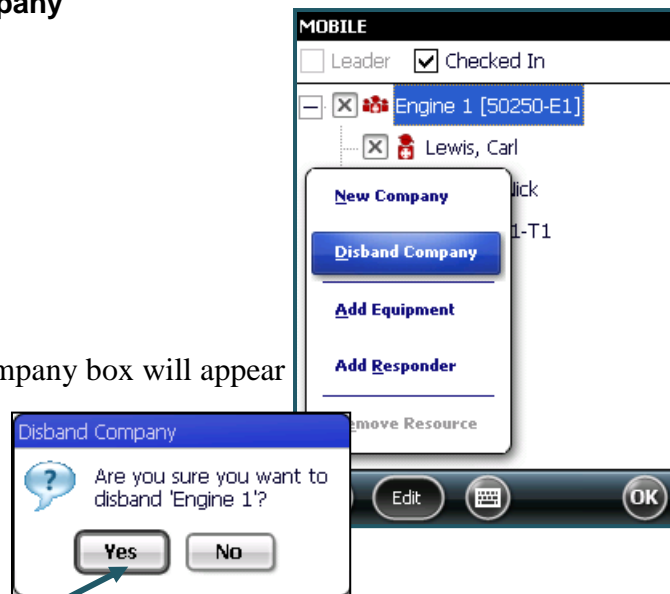

Tap on **OK**

The information will be stored in the Roster and will be available for use during an open incident.

## Disband a Company

The Disband Company box will appear

Tap on **Yes**

## Remove Resources from a Company in the Roster

Highlight the Resource

Tap on **Edit**

Choose **Remove Resource**

The Remove Resource box will appear

Tap on **Yes**

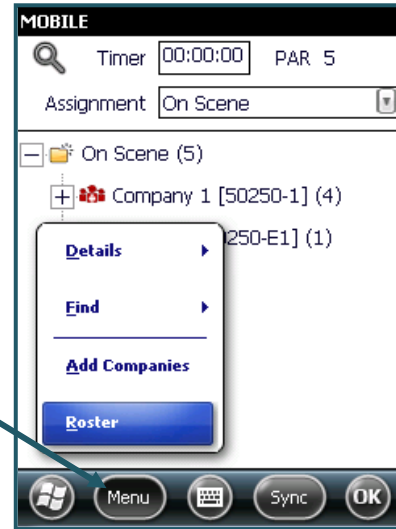

## Access the Roster during an Open Incident

To access the Resources that are stored in the Roster

Tap on **Menu**

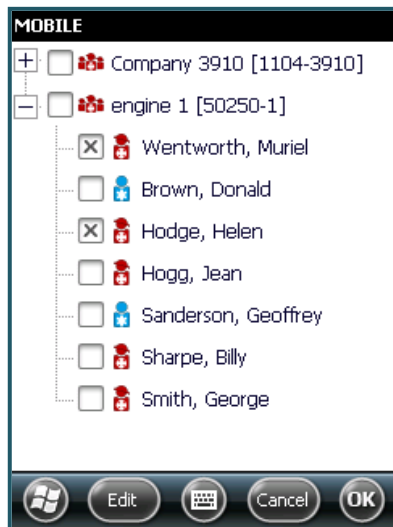

Choose **Roster**

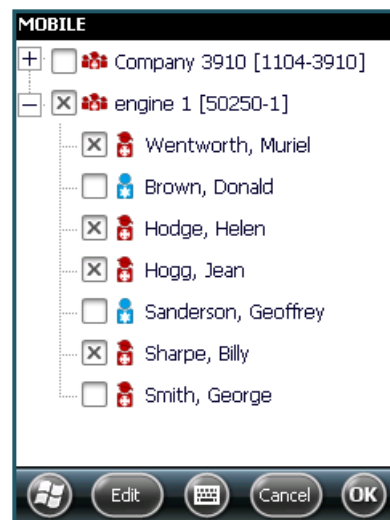

## Select Companies and/or Resources

From the Roster you may choose companies with or without the resources and any of the resources that are listed. The companies and resources that are checked will be added to the active incident assignment.

### Resources Only

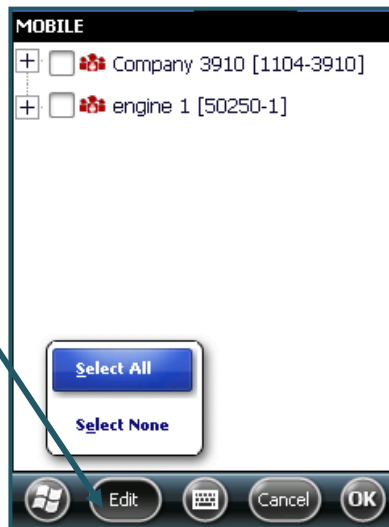

### Company with Resources

Tap on **OK**

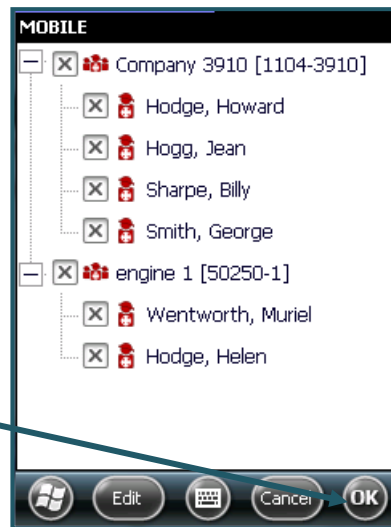

## Select All or Select None

Tap on **Edit**

When you **Select All** the companies and all of the resources will be checked and added to the active incident assignment.

Tap on **OK**

## Using *interTRAX*™ MOBILE ICS

Salamander barcodes including those found on resourceMGR ID tags, Equipment ID tags rapidTAG badges and rapidTAG evac™ wristbands as well as triage tags may be scanned and used in MOBILE ICS.

### Start a New Incident

The Main Screen will appear when the Settings have been entered during the initial setup and each time you start MOBILE.

Tap on **Menu**

Choose **New Incident**

The New Incident screen will appear

**Name.** Enter an incident name or leave it blank.

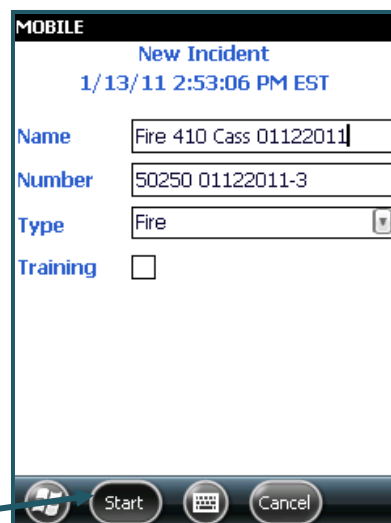

**Number.** Enter an incident number or leave it blank

**Type.** Choose from the dropdown

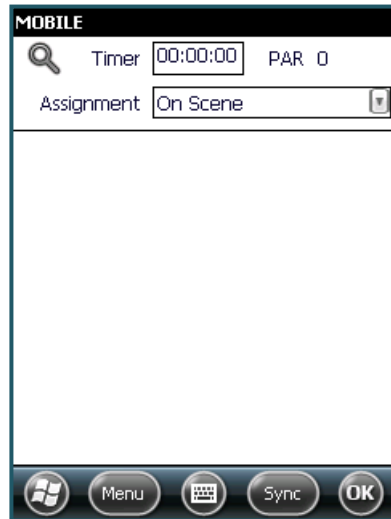

**Training.** Check this box if the event is a training session

Tap on **Start**

The Incident Screen will appear.

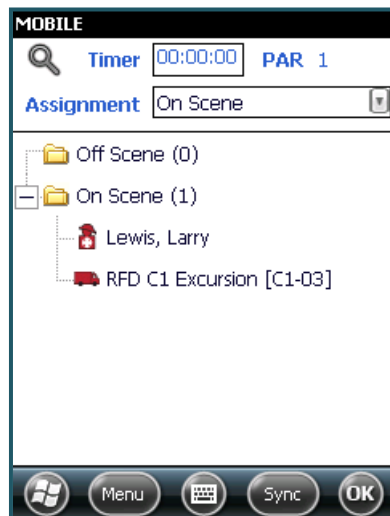

### Add Resources to an Open Incident

Choose the Assignment from the assignment dropdown or type an assignment into the box

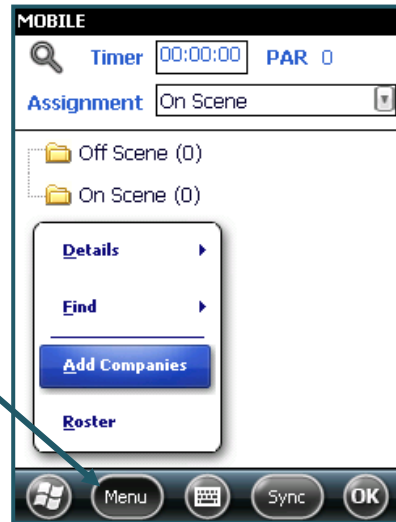

### Scan Resources

## Add a New Company to an Open Incident - Manual

Tap on **Menu**

Choose **Add Companies**

**Enter**

**Name\***. Type in a company name which is required. The maximum number of characters is 50.

**ID\***. Type in a company ID which is required. The maximum number of characters is 50.

**NIMS Type**

**Designation**

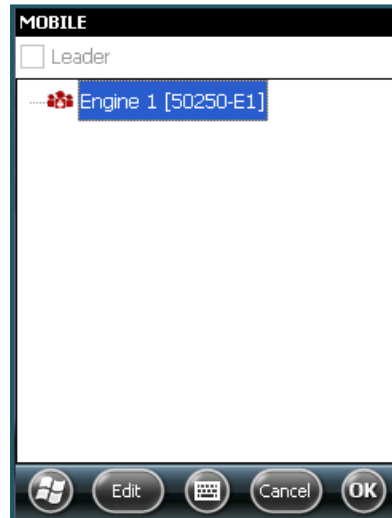

**Kind**

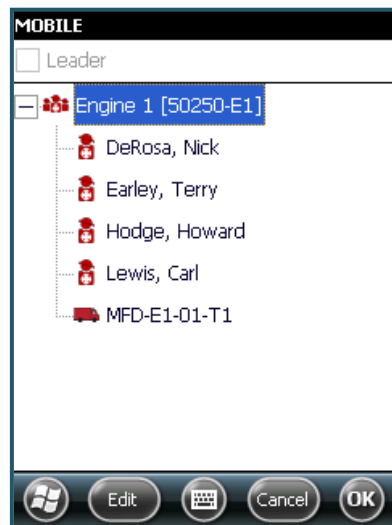

A screenshot of the 'New Company' form. It contains the following fields: 'Name\*' with the value 'Engine 1', 'ID\*' with the value '50250-E1', 'NIMS Type' with the value 'None', 'Designation' with the value 'Company', and 'Kind' with the value 'Engine'. At the bottom, there's a navigation bar with icons for a window, 'Create' (highlighted with a blue circle), a keyboard, and 'Cancel'. A blue arrow points from the 'Create' text to the 'Create' button in the navigation bar.

Tap on **Create**

The company will appear

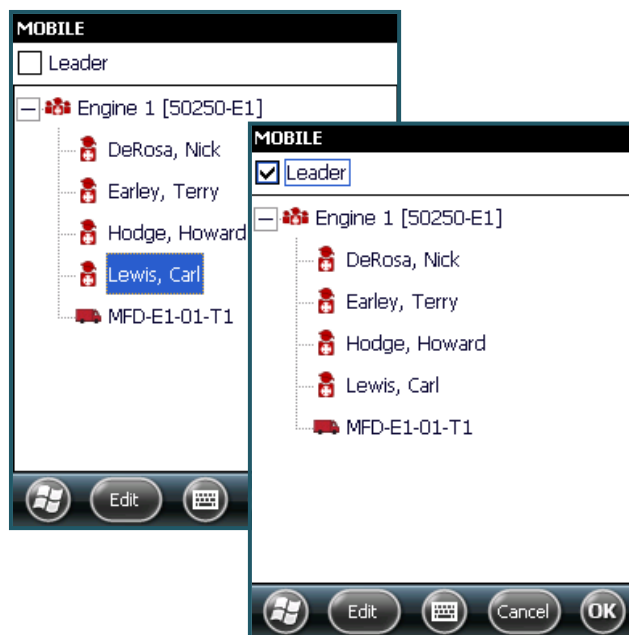

Scan resources

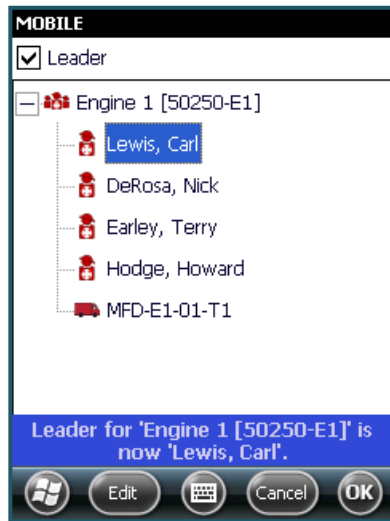

Set Leader

Highlight the resource

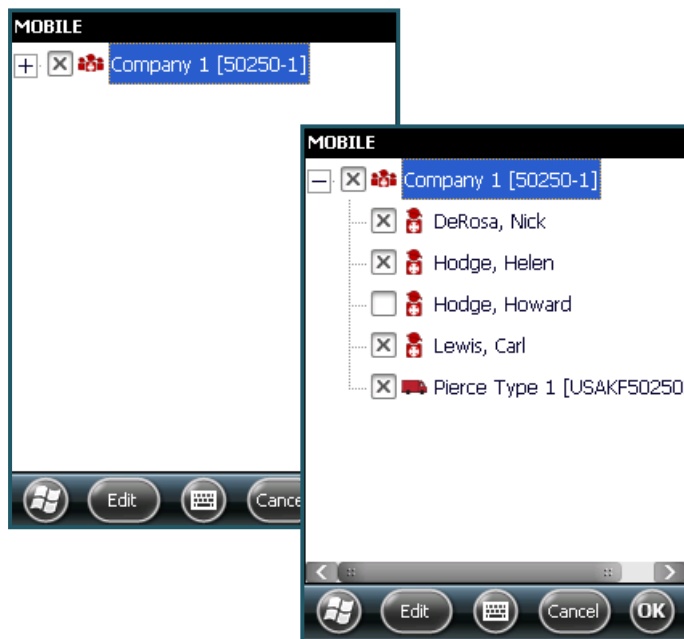

Tap on the **Leader** box

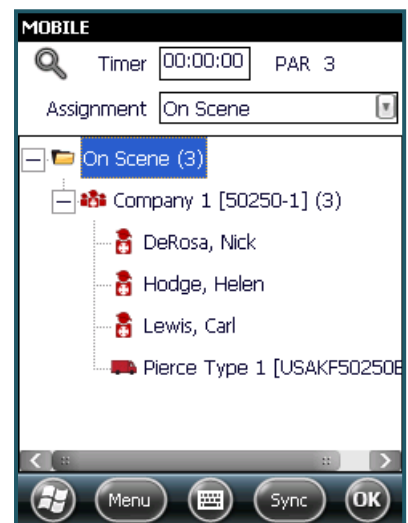

The Leader will appear at the top of the list

### Add a New Company to an Open Incident - Electronic

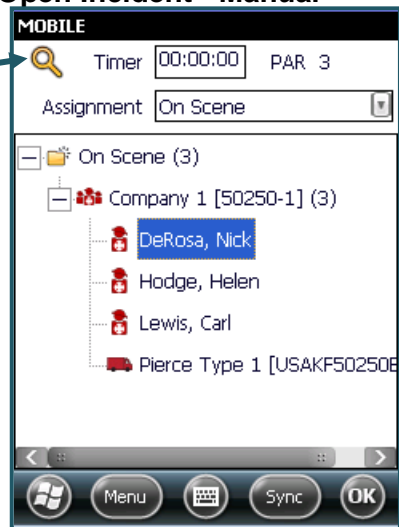

The company will appear in the incident and those resources that have been checked will appear

## Remove Resources from a Company in an Open Incident - Manual

Highlight the Resource

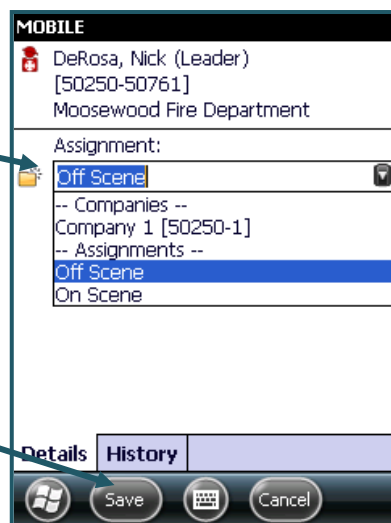

Tap on the **Details** icon

The Details screen will appear

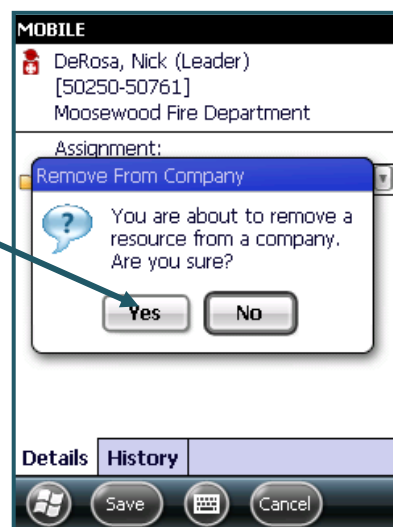

Change the Assignment

Tap on **SAVE**

The Breaking Company box will appear

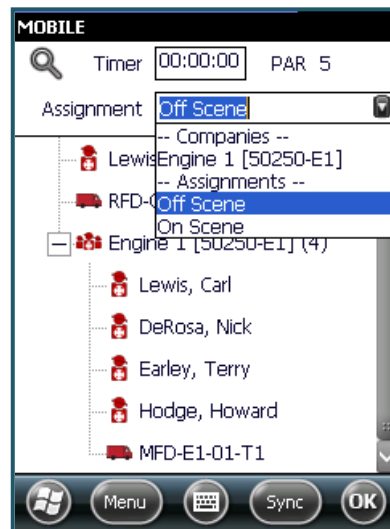

Tap on **Yes**

## Remove Resources from a Company in an Open Incident - Electronic

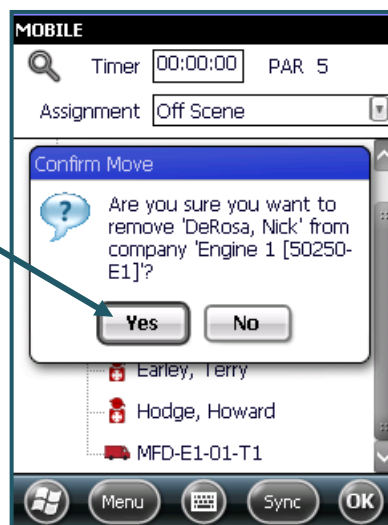

Tap on the Off Scene assignment

Scan the resource

The Confirm Move screen will appear.

Tap on **Yes**

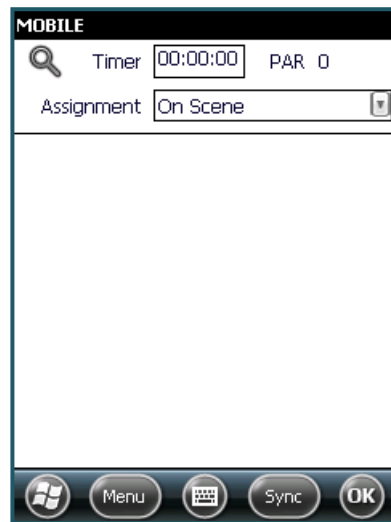

## **MOBILE ICS Functionality**

The basis for the functionality of *interTRAX*™ Mobile is Incident Management System Accountability. Each Company and each Resource not attached to a Company must be attached to an Assignment. Each Evacuee or Patient must be attached to an Assignment. Assignments may be scanned or manually entered.

When you start a new incident the **Incident** screen will appear. The Mobile Assignment dropdown comes preloaded with the OFF SCENE and ON SCENE assignments

The Assignment that appears in the Assignment box is the active assignment and all companies, responders, evacuees or patients when entered will appear as part of that assignment.

The screenshot displays the 'MOBILE' interface. At the top, there is a search icon, a 'Timer' field set to '00:00:00', and a 'PAR' field set to '0'. Below these is an 'Assignment' dropdown menu currently showing 'On Scene'. The main area of the screen is a large, empty white box. At the bottom, there is a navigation bar with five buttons: a Windows logo, 'Menu', a list icon, 'Sync', and 'OK'.

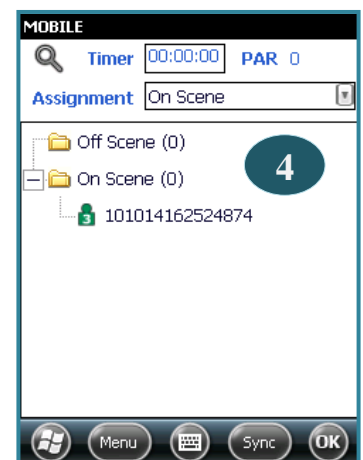

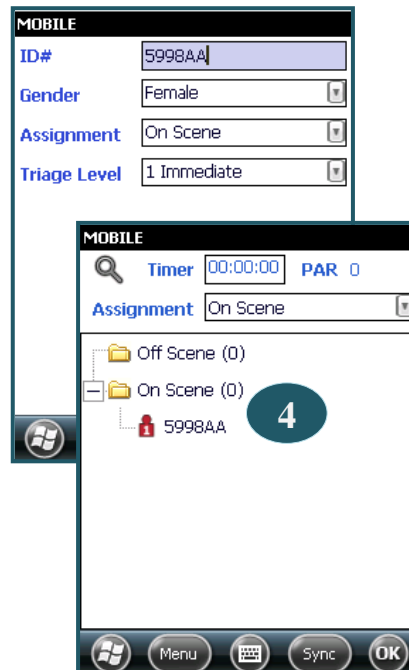

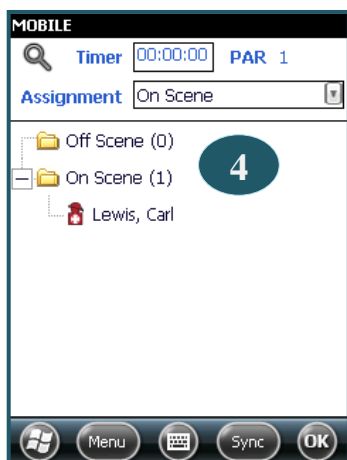

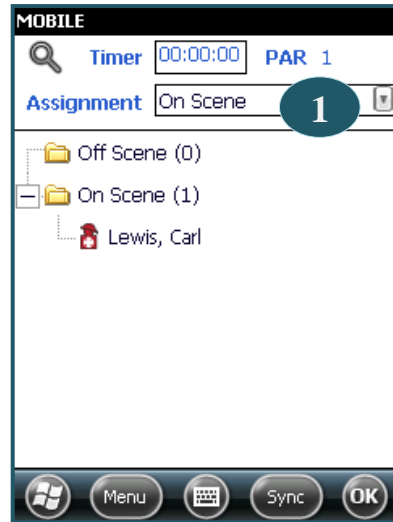

## Examples

### 1 Assignment

### 2 Scan

### 3 Information container

### 4 Resource attached to an assignment

## Open, Close and End an Incident

### Open

To open an incident tap on the incident to highlight and tap on the **Open** icon

An incident that is still in progress will have a YES status in the Open column.

An incident that has been ended will have a NO status in the Open column. You may open an ended incident.

NOTE: Only one incident may be open at a time.

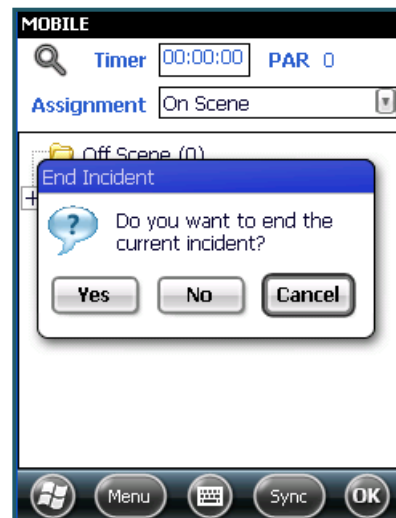

### Close or end on incident

To close or end an incident tap on OK in the bottom right hand corner of the screen. The End Incident box will appear.

**Yes.** The incident will be ended.

**No.** The incident will close and will not be ended.

**Cancel.** You will return to the open incident.

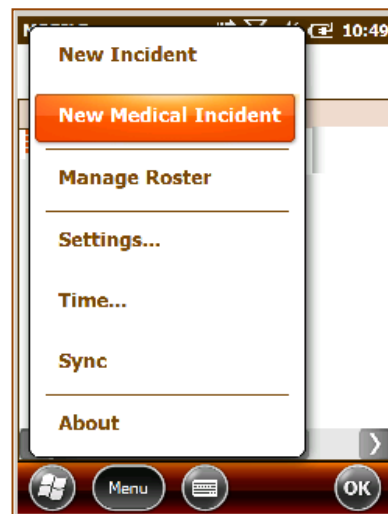

## Using *interTRAX*™ MOBILE (EMS)

### New Incident`

Tap on **Menu**

Choose **New Medical Incident**

The New Medical Incident screen will appear

**Name.** Type in the name or use the default  
**Number.** Type in the Number or use the default  
**Incident.** Choose from the dropdown. This is optional however it may be used to attach to an in progress interTRAX Exchange medical incident.  
**Assignment.** Choose from the dropdown. This is optional unless you will be attaching to interTRAX Exchange  
**Training.** Check this box if the event is a training session

Tap on **Start**

The Mobile (EMS) Patient Log screen will appear

### Detailed

## Rapid Entry

Tap on the Rapid Entry button.

The screenshot shows the MOBILE app interface. At the top, there's a status bar with 'MOBILE', signal strength, Wi-Fi, and the time '10:26'. Below this is a search icon and two radio buttons: 'Detailed' (unselected) and 'Rapid Entry' (selected). Underneath are three tabs: 'IdentityCode', 'Assignment', and 'Tri...'. The main area is empty. At the bottom, there's a navigation bar with icons for a menu, 'Begin', a list, 'Sync', and 'OK'.

Enter the information.

The red items are required.

Scan any number of triage tags using the information that you entered.

When you tap on OK the information will be sent to the Patient Log.

The screenshot shows the MOBILE app interface with the 'Rapid Entry' screen. It has a status bar at the top with 'MOBILE', signal strength, Wi-Fi, and the time '11:30'. Below the status bar are two dropdown menus: 'Agency' and 'Agency Unit'. Underneath are three red-labeled fields: 'Assignment' (with a dropdown), 'Destination' (with a dropdown), and 'Triage Level' (with a dropdown). Below these is a section titled 'Last Scan' containing the following information: 'Triage # 6051AE', 'Scan Time 2011/07/22 15:30:34', 'Agency Agency', 'Agency Unit Unit', 'Assignment Assignment', 'Destination The Destination', and 'Triage Level Blood Red'. At the bottom, there's a navigation bar with icons for a menu, a list, and 'OK'.

To continue entering patients click on the **Begin** button.

The screenshot shows the MOBILE app interface with the 'Patient Log' screen. It has a status bar at the top with 'MOBILE', signal strength, Wi-Fi, and the time '11:57'. Below the status bar are two radio buttons: 'Detailed' (unselected) and 'Rapid Entry' (selected). Underneath are three tabs: 'IdentityCode', 'Assignment', and 'Tri...'. The main area displays a list of patient entries. Each entry has a small icon, an 'IdentityCode', an 'Assignment', and a 'Tri...' column. The entries are: 1107221459... Reception Cen..., 1107221510... Assignment, 6051AE Assignment, 8567AE Assignment, 8568AE Assignment, 8570AE Assignment, 8571AE Assignment, and 8573AE Assignment. At the bottom, there's a navigation bar with icons for a menu, 'Begin', a list, 'Sync', and 'OK'.
